

Cookies

A cookie is a small text file that is sent to your computer when you visit a website. The information is then sent back to the server each time the browser requests a page from the server. This enables the web server to identify and track the web browser.

We use “session” cookies on this website. We will use the session cookies to: keep track of you whilst you navigate the website; and other uses.

On this site buttons are included to promote or share pages on social networks (LinkedIn). These buttons are realized by code that is supplied by the social networks themselves. This code places, among other things, a cookie.

Session cookies will be deleted from your computer when you close your browser. Persistent cookies will remain stored on your computer until deleted, or until they reach a specified expiry date.

When collecting information, each visitor is assigned a unique identifier, so that multiple mouse clicks from the same visitor are recognized. This identification is stored in a cookie of the visitor's browser.

We use Google Analytics to analyse the use of this website. Google Analytics generates statistical and other information about website use by means of cookies, which are stored on users' computers. The information generated relating to our website is used to create reports about the use of the website. Google will store this information. Google's privacy policy is available at: <http://www.google.com/privacypolicy.html>.

If you do not want to accept cookies, you can always indicate this in the settings of your browser. If you disable cookies, it is possible that certain functionalities of the website do not work.
